FRANCE SURPRISES ITALY WINNING 2-4

France surprises everyone winning Italy 2-4 in a match that Italian players, as they made yesterday, had dominated with a 2-0, but the French have achieved to make a goal psychological little before the halftime and, in a very good second time, to turn the scoreboard upside down in front of one of the most powerful selections.

Now Italy remains in a difficult situation if they want to go to the semi-finals since tomorrow they will have to win to the World Team Protex that has being demonstrating a very high level of game and in the two first matches has won clearly the same rivals wich the Italian selection has not been able to win.
